### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Xavier Pillai on 10/25/2004.

The application has been amended as follows:

#### IN THE CLAIMS:

In claim 20, lines 5-6, --is not photosensitive and-- has been inserted between "layer" and "consists".

In claim 21, line 3, --being non-photosensitive and-- has been inserted between "layer," and "consisting".

In claim 22, lines 4-5, --being non-photosensitive and-- has been inserted between "layer," and "consisting".

2. The following is an examiner's statement of reasons for allowance:

Nojiri, Taylor, Tanaka, and Lipson have been cited to teach acrylic resin-containing compositions to that of layer (A) as claimed, but these resins are each photosensitive. Koike has been cited as rendering obvious the deposition of a layer (A) which need not be photosensitive and a photosensitive layer on top of it before exposing to light, developing and baking. However, it does not, alone or in combination with the other references, fairly teach or suggest that the composition of the lower layer is a non-photosensitive layer of the claimed composition.

Therefore, the prior art of record does not fairly teach or suggest depositing a non-photosensitive layer (A) consisting essentially of an acrylic polymer with the claimed molecular weight and acid number, a fluorescent substance, a ethylenically unsaturated compound with the claimed viscosity, and the claimed concentration of a polymerization inhibitor and photosensitive layer (B) on top of layer (A), exposing the layers to light, and then developing and baking the layers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
